

Drinking Water Tests

Test	When to Test	Testing Frequency	Price
Arsenic	Every well	Test once and retest based upon level detected	\$35.00
Coliform Bacteria (Includes E.coli)	Every well	Test once every year, or when there is a change in taste, color or odor	\$28.00
Fluoride	Wells used by infants and preschool-aged children	Test when infant is born	\$20.00
Hardness	Homes with scum or scale deposits on sinks, toilets. White flakes in water.	Once to detect Hardness level and determine if softener is needed	\$15.00
Iron	Homes with yellow or brownish staining on fixtures or clothing.	Once to detect Iron concentration and determine if treatment is needed	\$18.00
Lead	Homes with plumbing installed before 1985	Consider a one time test	\$35.00 +Copper=\$50
Nitrate	Every well	Test annually. If EPA drinking water standard is exceeded it is recommended pesticide/herbicide scans are performed.	\$30.00

Drinking Water Packages

Package	Description	Price
Well Water Safety: (Coliform Bacteria (includes E.coli) , Nitrate, Arsenic)	This package analyzes three common parameters for drinking water safety. If Nitrate exceeds the EPA drinking water standard it is recommended pesticide/herbicide scans are performed.	\$75.00
Primary Metal Contaminants: (Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Copper, Lead, Mercury, Selenium, Thallium)	This package analyzes EPA established primary metal contaminants that may have adverse effects on your health.	\$150.00
Secondary Drinking Water Contaminants: (Aluminum, Chloride, Copper, Fluoride, Iron, Manganese, pH, Silver, Sulfate, Total Dissolved Solids, Zinc)	This package analyzes EPA established secondary contaminants that may have cosmetic or aesthetic impacts on water.	\$120.00

Organic & Radioactivity Packages

Package	Description	Price
Volatile Organic Compounds: (This package includes a scan of VOC's including Benzene, Ethene, Styrene, Toluene, Vinyl Chloride, Xylene and more)	This scan analyzes EPA established common industrial contaminants found near industrial areas, landfills, gas stations, junkyards, dumps, or dry cleaning operations. Recommended every 5-10 years.	\$125.00
Pesticides: (Alachlor, Aldrin, Atrazine, Butachlor, Chlordane, Dieldrin, Endrin, Heptachlor, Lindane, Methoxychlor, Metolachlor, Metribuzin, Propachlor, Simazine, Toxaphene)	This scan includes common organochlorine & N/P Pesticides. Recommended if near agricultural operations or if well contains high Nitrates.	\$175.00
Herbicides: (2,4-D, Dalapon, Dinoseb, Pentachlorophenol, Picloram, Silvex)	This scan includes common agricultural Herbicides. Recommended if near agricultural operations or if the well contains high Nitrates.	\$200.00
Radioactivity: (Radium 226, Radium 228, Uranium, Gross Alpha)	This package analyzes for a list of radionuclides potentially found in drinking water due to erosion of natural deposits.	\$325.00

* Credit Card Transactions over \$250 will be charged a 3% processing fee.

*Sampling kits may be ordered and picked up from our Neenah Lab at (800) 776-7196 or our Green Bay Lab (920) 434-6741.

*Third party field sampling services available. Pricing dependant on location.
